Topic: Habitat of a frog

A frog lives in a pond where he has a perfect home. He can find his food and water easily. They need water to keep their skin moist and to lay their eggs.

Frogs can live on land, in damp, shady places with plants and grass.

Very ^{*}informative!

Topic: Habitat of a cactus

Draw a habitat of cactus and explain how it survive in the desert.

A cactus can survive in the hot, dry desert because it has special features.

Thick stem: stores water for a long time.

Waxy skin: stops water from escaping.

Spines: protect it from animals.

Long roots: quickly absorb water when it rains.

Small or no leaves: this helps prevent water from drying out.
