Note: The worksheet is based on the paper pattern; however, it covers just two topics. This worksheet aims to reinforce knowledge and understanding. Follow the guidelines given below before attempting it:

1. Read the question (blanks, true/false, and question-answer) carefully at least two times.
2. If it's a true/false question:
    - Look for the **dates, names, facts, and figures**.
    - Usually that is what you are tested on.
    - Secondly, look at the marks. If there are 3 statements and it has 5 Marks, do a little calculation. Subtract the statements from the marks (5-3=2). The answer you get will tell you how many are false.
    - Because the **false statement has 2 marks** (1 for telling false and 1 for writing the correct statement) and true statement has 1. This is a good trick if you find yourself in a difficult situation.
3. If you are working on a question/answer:
    - **Read the question 2 times,** then look at the marks.
    - Is it a 4-mark or 3 Mark question?
    - **Because marks tell you exactly how much you need to write.**
    - Then look at whether the question is asking one thing or two. (Look at Q3 and Q4. They are asking for two things. So don't forget to write about **both parts** of the question.)
    - Then look out for the **question verbs**. For example, in this worksheet, the verbs are "What, Explain, Enlist, Mention, and Write"; they tell you exactly what you should focus on in the question.
